COMMVAULT CLOUD FOR GOVERNMENT · MANAGED BY KELYN

The first MSP for Commvault Cloud for Government.

Commvault's FedRAMP High authorized SaaS data protection and cyber resilience, delivered and run for government agencies by KELYN Technologies, so agencies stay focused on their missions instead of managing backup infrastructure.

16 hours
to restore 16 TB at MDA, previously 3+ days

6 weeks
MDA platform migration, vs. a typical 6–12 months

First
MSP for Commvault Cloud for Government

WHY IT MATTERS

Modernize data protection without compromising security.

Commvault Cloud for Government provides certified infrastructure for sensitive government workloads and simplifies compliance with NIST, CMMC and other regulatory frameworks.

01

24/7 U.S.-based monitoring

Round-the-clock monitoring, management and support from certified data protection specialists.

02

Proactive management

Continuous optimization, automated patching and performance tuning.

03

Rapid incident response

Expert-led recovery procedures to restore operations quickly during critical events.

04

Expert implementation

Migration and deployment services with comprehensive knowledge transfer.

SERVICE LEVELS

Choose your service level.

GUIDED MANAGEMENT

CoPilot

Expert guidance and technical consultation for agencies with existing IT teams.

- Technical consultation sessions
- Expert guidance on best practices
- Priority support channels
- Custom implementation playbooks

FULLY MANAGED

Pilot
