

Comprehensive Ransomware Protection and Recovery at Scale with **Datastor Assured Recovery (DAR)** by

Step into the realm of superior data security and flexibility with **Datastor Assured Recovery (DAR)** by **KELYN Technologies**. We provide trusted solutions that redefine the standards of data protection and agility for the most demanding organizations.

Our Secure Air Gapped Storage ensures your data remains impervious to threats, nestled within isolated copies that stand resilient against potential breaches. With our Tamper-Proof Immutable Storage, your backup copy remains secure through robust multi-layered access controls, leaving no room for unauthorized alterations. Experience unparalleled agility through our Instantly Scalable infrastructure, boasting rapid deployment, streamlined management, and effortless scalability tailored to your evolving needs. And with our Granular Recovery options, precision restoration is at your fingertips, offering both point-in-time and bulk recovery capabilities meticulously crafted to fit your requirements.

Trust KELYN Technologies and our DAR solutions to elevate your data security to new heights, backed by unwavering confidence and expertise. Learn more at datastor.io.

Secure Air Gapped Storage

Safeguard your data with isolated copies stored independently from primary environments, ensuring an impenetrable barrier against cyber threats.

Tamper-Proof Immutable Storage

Fortify your backups with unalterable integrity, reinforced by multi-layered zero-trust access controls, guaranteeing data immutability against unauthorized modifications.

Instantly Scalable

Seamlessly expand your infrastructure with swift deployment, streamlined administration, and effortlessly adaptable scalability, all at your fingertips.

Granular Recovery

Effortlessly restore data with precision using granular, point-in-time, and bulk recovery options, providing flexible restoration capabilities tailored to your specific needs.
